Panattoni Park
SCARMAGNO

89.831 m²

12 m clear height	9,900 sqm minimal module	18x18 m column grid	92 dock levellers	376 parking spaces
60 parking spaces	ESFR sprinklers system	32 m truck court	5 t/sqm floor loading	4.2 MWp roof PV system
				BREEAM® Very good

The new development project is located in Scarmagno, just 35 km north of Turin, in a strategic position with high visibility and excellent access to the road network of Western Italy.

The area is very well served by road infrastructure: being right in front of the Scarmagno highway exit, it enjoys a quick connection to the A4 and A5 highways in multiple directions.

Grazie alla sua prossimità con il casello autostradale, l'area gode di collegamenti verso sud, in direzione di Torino e Genova, nonché verso est, in direzione di Milano.

Inoltre, il sito è collegato tramite autostrada ad Aosta, permettendo quindi accesso ai confini con la Francia tramite il Traforo del Monte Bianco o il Tunnel del Frejus, e alla Svizzera attraverso il Traforo del Gran San Bernardo.

Turin **35 km**
Milan **105 km**
Malpensa Airport **115 km**
Genoa Harbour **180 km**

The new development project is located in Scarmagno, just 35 km north of Turin, in a strategic position with high visibility and excellent access to the road network of Western Italy.

The area is very well served by road infrastructure: being right in front of the Scarmagno highway exit, it enjoys a quick connection to the A4 and A5 highways in multiple directions.

Thanks to its proximity to the highway exit, the area has connections to the south, towards Turin and Genoa, as well as to the east, towards Milan.

Furthermore, the site is connected by a highway to Aosta, providing access to the borders with France through the Mont Blanc Tunnel or the Frejus Tunnel, and to Switzerland through the Great St. Bernard Tunnel.

France (Mont Blanc Tunnel)	110 km
France (Frejus Tunnel)	130 km
Switzerland (Gran San Bernardo)	100 km

Panattoni, leader europeo nel settore immobiliare industriale, promuove lo sviluppo sostenibile.

Ad oggi abbiamo consegnato oltre 2 milioni di metri quadrati di strutture Panattoni, che sono state certificate da BREEAM New Construction International, LEED e DGNB. Altri 2 milioni di metri quadrati sono in fase di certificazione. Tutte le nostre attività sono condotte nello spirito dello sviluppo

sostenibile e con attenzione all'ambiente. L'approccio allo sviluppo sostenibile è parte della strategia a lungo termine di Panattoni, mentre sostiene gli obiettivi di partner, investitori e clienti. Siamo orgogliosi di dire che Panattoni stabilisce la direzione per l'intero settore!

Panattoni, market leader in industrial real estate in Europe, promotes sustainable development.

To date, we have completed more than 2 million square meters of Panattoni facilities certified by BREEAM New Construction International, LEED and DGNB. Further another 2 million square meters are being certified. All our activities are conducted in the spirit of sustainable

development and with care for the environment. The sustainability approach is part of Panattoni's long-term strategy and at the same time supports the goals of partners, investors and clients. We are proud to say that Panattoni is setting the direction for the whole industry!

BREEAM: Il metodo di certificazione degli edifici più popolare al mondo, usato da proprietari, sviluppatori e affittuari. Si tratta di valutare gli edifici in termini di sostenibilità ambientale.

BREEAM: world's most popular building certification method used by the owners, developers and tenants of real estate. It involves the assessment of buildings in terms of their environmental sustainability.
